## RESPONSE GOALS

- Protect the public's health by minimizing the spread of H1N1 influenza in the community.
- Achieve situational awareness about flu activity in King County and impacts on the healthcare system and the broader community
- Support the informational and medical resource needs of healthcare partners
- Maintain consistent and timely public information about H1N1 flu and response activities
- Maximize availability of H1N1 vaccine to protect the public's health
- Maintain continuity of Public Health operations

## SUMMARY OF EVENT

## **CURRENT SITUATION**

Several indicators continue to show rising influenza activity in King County. Emergency department visits for influenza-like illness continue to increase. Hospital admissions for 2009 H1N1 flu are approaching levels seen at the height of the spring outbreak. The number of hospitalizations where flu subtyping has not been performed is increasing as well, and many of these are likely to be 2009 H1N1 flu cases. Clinics that are part of Public Health's influenza surveillance system are showing more activity recently, with both the number of specimens and the percentage of positive tests for influenza unusually high for this time of year.

Between 10/4/09- 10/23/09 the following hospitalizations and deaths have been reported to Public Health

Confirmed 2009 H1N1 hospitalizations: 28

2009 H1N1 deaths: 1

Non-H1N1 or not tested influenza hospitalizations: 38

Non-H1N1 or not tested influenza deaths: 1

**Public Health - Seattle and King County**  
**Hospital admissions and deaths due to laboratory-confirmed influenza**

## Daily Count of ED Visits for Influenza—Like Illness By Age Group

ALLHOSPITALS, Last Updated Oct 22, 2009

School absenteeism also continues to increase with some elementary, middle and high schools reporting absenteeism above 10%.

### **H1N1 VACCINE**

Manufacturing delays in the in the production of H1N1 vaccine led to a significant decrease in the expected number of doses currently available nationwide.

Public Health is continuing to place orders for the allocated H1N1 doses on behalf of King County healthcare providers enrolled as H1N1 vaccine providers. As of 10/26/09, the CDC and Washington State Department of Health have allocated 132,000 doses of H1N1 vaccine to King County. Approximately 85,000 doses of the allocated vaccine have been delivered to healthcare providers or have been provided to individuals within the priority groups. The remaining doses are in the process of being ordered. Public Health Seattle and King County continues to evaluate strategies for reaching priority groups for vaccinations.

### **MEDICAL RESOURCES**

The Washington State Department of Health is expecting to receive an allocation of N95 masks from the Strategic National Stockpile in the next 10 days. 3Ms and Kimberly Clark masks are included in the shipment however numbers of each size and manufacturer are unknown at this point.

Public Health Seattle and King County is developing an allocation strategy for PPE received from the Strategic National Stockpile.

### **PUBLIC HEALTH FLU HOTLINE**

The Public Health Flu Hotline is open and staffed with general operators and nurses to provide H1N1 information, including questions related to vaccine availability and medical triage by nurses. As of the end of 10/26/09 the Flu Hotline received 3624 calls. The Flu Hotline number is 1-877-903-KING (5464). Operators and nurses are available Monday-Friday 9am 5pm. The recorded messages are available 24 hours daily.

### **HEALTH AND MEDICAL AREA COMMAND – OPERATIONAL OBJECTIVES**

1. Maintain situational awareness regarding flu activity in King County and impacts on the healthcare system and the broader community
2. Continue to monitor and support the availability of antivirals.
3. Prepare to expand the Public Health Call Center operations to manage questions from providers and the public
4. Develop and disseminate messaging regarding vaccine orders and delivery for media, public and providers
5. Allocate available formulations for H1N1 vaccine to PH, EMS and healthcare providers.
6. Finalize plan for personal protective equipment allocations

### **MAJOR ACTIONS**

- Ongoing influenza surveillance
- Finalizing distribution plan for Tamiflu® oral suspension
- Hosting reoccurring conference calls with regional pharmacies regarding commercial availability of Tamiflu® supplies
- Operating Public Health Flu Hotline with general operators and nurses to answer H1N1 influenza questions
- Developing communication materials and addressing media inquiries regarding H1N1 vaccine delivery
- Managing allocation of available H1N1 vaccine formulations
- Developing allocation plan for PPE that will be received from Strategic National Stockpile
